

EHEDG NZ Committee Member Profile

Name: Euan Brouwers
Company: CNC Design Ltd.
Position: General Manager
Location: Auckland (East Tamaki)
Committee Role: Secretary (Process Equipment Supply Sector)

Biography:

Euan has been involved in the design of automated machinery for over 14 years, working in both New Zealand and the United Kingdom.

He holds a Bachelor of Engineering in Mechatronics with first class honours from The University of Auckland.

Euan is the General Manager at CNC Design, the New Zealand representative for Staubli Robotics, a European company specialising in robots for the food industry.

CNC Design has been operating in New Zealand since 1989 in the industrial automation space. Since its inception it has distributed Siemens automation

and drive products to OEMs and end users, as well as providing consulting, design, engineering and implementation services to bring these products to market. CNC Design have a history of providing these services to companies manufacturing or operating food processing machinery. In 2010 CNC Design became the distributor for Staubli Industrial Robots in New Zealand, as there was a clear market for robots designed for operation in the food industry where hygiene was critical.

Staubli robots fit this requirement perfectly, being designed to EHEDG principles to optimise cleanability and hygiene. They have found a home in the meat industry in New Zealand due the advantages of not needing to be covered due to their design. To this end CNC Design has a keen interest in hygiene around machinery in the food space, and passionate about reducing hygiene risks to as low as reasonably practical by good design and equipment selection.

CNC Design is a Company Member of EHEDG.
